To Whom It May Concern:

RE: Hanson Parcel (APN 729-29-017)/Lot Square Footage Certification

It must be noted that our certification is not based on any field boundary survey. It is, however, entirely computed from my record boundary research, deciphering and CAD plotting of legal descriptions obtained from Hanson Grant Deed, document no. 19421093 and legal description from the reference Corporation Grant Deed (book 9080, page 255).

Net area of said parcel computes to be 32,650 square feet more or less. Lot dimensions resulting from our analysis seem to jibe with the assessor's parcel map. Any questions related to this matter may be directed to me.

Sincerely,

Harry Singla, PE, PLS
