Hi Tammy,

I apologize for the late response, we have been responding the fire emergency situation.

We have recently reviewed and accepted site geologic and soils reports for the damaged home next door. Do you have copies of these?

As for the subject property, any proposed development would require both a geologic and soils report for a homesite, septic location and driveway. I suggest you contact a local geologist to provide an initial consultation for the property, as they would be able to give you a preliminary cost for the preparation of these reports (see attached list).

Thank you,

Jessica deGrassi

LOCAL CONSULTANTS FOR ENGINEERING GEOLOGIC REPORTS

This list includes engineering geologic consultants who have recently completed reports for projects in Santa Cruz County and who are familiar with County Guidelines for Engineering Geologic Reports. This is not a complete listing of state registered consultants. Completion of Engineering Geologic Reports by a consultant on this list does not guarantee acceptance of the report by the County Planning Department.
