260 ft

MEDIAN NEARBY DEPTH

50 ft

MEDIAN STATIC WATER LEVEL

30 gpm

MEDIAN YIELD

What this means

Wells within 2 miles of this property were drilled between 81 ft and 803 ft deep. The static water level is how far down the water sits once the well is drilled; yield is how fast the well produces. A domestic household typically needs 5–10 gpm.

Estimated cost to drill here

Based on the median nearby well depth of **260 ft** and published per-foot ranges (drilling only \$25–\$65/ft; complete system \$60–\$100/ft, checked 2026-06-11):

- Drilling + casing: **\$6,500 – \$16,900**
- Complete system (pump, tank, hookup): **\$15,600 – \$26,000**

Sources & method

All well records are from the California Department of Water Resources' Well Completion Reports database — the state's official record of water well construction filed by licensed drillers. Distances are computed from recorded coordinates; location accuracy varies by record (the majority of wells are plotted at the center of the 1-mile Public Land Survey System section they were filed in, per DWR — not the exact wellhead location).

Cost ranges apply published per-foot rates to the local median depth and are planning estimates, not quotes. This report is informational only and is not a substitute for a well inspection, water test, or professional advice.
